

Original Equipment Parts for Maximum Performance

At Van der Stähl Scientific, we understand that reliable medical device packaging starts with dependable equipment, and that means using original equipment parts designed specifically for your machine. Our parts department is led by Lisa Wassberg, our in-house parts expert who knows every detail of our packaging and testing systems. We know how frustrating it can be to work with companies that don't understand their own products. With our Six Sigma certified team, you'll always receive the correct components to keep your medical device packaging program running smoothly and in compliance.

We also offer complete service kits that include the most critical consumable parts for your equipment. A strong preventive maintenance plan is essential for any sterile packaging operation, and using genuine OEM parts helps protect your validation efforts. Don't risk downtime or non-compliance, order your service parts today and keep your operation performing at its best.

In Stock and Ready to Ship

We maintain thousands of OEM parts in inventory to help keep your packaging lines online. Orders are typically packed within minutes, and we offer multiple shipping options to get your parts to you quickly and safely.

Service Kits

Get the kit. Our service kits include all essential consumable components needed to keep your medical device packaging equipment operating at peak performance. Kits are available in Standard or Plus configurations so you can choose the level that best fits your maintenance strategy.

Parts Support

Our engineering team provides phone support to ensure your new parts are installed correctly and safely. Behind every part we ship is a skilled technician ready to guide your maintenance staff through proper installation. Contact our parts support group for details on complete service kits and replacement components for your specific machine.

Quality Machine Parts

Whether you prefer to replace parts yourself or have one of our technicians service your equipment, we're here to support you. We offer in-lab and on-site service options, and we can perform calibration in our ISO 17025 accredited laboratory after your maintenance is complete.

Order Individual Parts or Complete Service Kits

Keep your medical device packaging equipment running smoothly with genuine OEM parts. Van der Stähl Scientific stocks thousands of components to help minimize downtime and maintain compliance. Most orders ship the same day and are packed with care to ensure safe delivery. Our machine experts can guide you to the correct part for your model and application.

Routine maintenance is essential for sterile packaging operations. Let us help you stay compliant with your preventive maintenance plan through our full line of service and replacement parts, including:

- Complete service kits
- Custom thermal test leads
- Custom-cut glass sheets and tape
- Replacement microprocessors
- Preventive maintenance guidance
- Dye penetration kits
- Seal-check test strips
- Machine calibration kits

In Stock, Ready to Ship

We process parts orders throughout the day to shorten turnaround times, most orders ship the same day. From a single screw to a microprocessor, every part is backed by a knowledgeable, caring team that understands your equipment.
